

Change the Future of Business Collaboration

eBeam Edge for Business™ is a portable solution that transforms any flat surface into an interactive, collaborative workspace.

Today's business meeting can be ineffective and inefficient. Participants are distracted by cell phones and laptops, geographically dispersed colleagues lack context in meetings, and notes are taken and interpreted individually rather than collectively.

eBeam Edge for Business creates an interactive, virtual meeting environment that fosters lively collaboration regardless of location. Present your concepts with eBeam Edge for Business, easily incorporating multimedia files, collecting feedback and connecting with remote colleagues through secure meeting sharing.

The four ounce device fits in a pocket and installs in seconds, ensuring that content created in offices, cubicles and meeting spaces is captured in its original form. Content can be saved in a variety of formats including PDF and JPEG.

With the ability to record and share your work in real time from any location, eBeam Edge for Business shortens the workflow processes of distributed teams and brings efficiency to meetings and brainstorming sessions.

Capture, communicate and collaborate with eBeam Edge for Business.
